This section is intended to provide detailed information to JetFuelTenders.com users about the platform features.

HOW TO PLACE A TENDER BID

A step by step guide for jet fuel suppliers.

In this short video you will learn how to:

- Respond to a tender invitation
- Activate JetFuelTenders.com user account
- View received tender information
- Enter supply conditions
- Enter bid information
- Save bid templates for each location for future use
- Submit a tender bid

Our Support Team is happy to answer any questions or provide free one-on-one training.

Contact us at info@jetfueltenders.com

EXPORT TENDERS INFORMATION TO EXCEL

A step by step guide to exporting tender information and bids.

JetFuelTenders.com currently allows users to Export initial tender information and bids to a downloadable Excel format.

1. Sign in to jetfueltenders.com
2. On the Tenders page select the tender which should be exported
3. On the Tender detail page click on Export and select the type of Excel document which is required
 - **Export Tender Information** will generate an Excel file with initial tender information
 - **Export Tenders Bids** will generate an Excel file with the submitted bids

Our Support Team is happy to answer any questions or provide free one-on-one training.

IMPORT BIDS FROM EXCEL

JetFuelTenders.com have updated the tender importer to simplify the bid import process. User no longer need to reference external code resources. All selectable options are now selectable from the dropdown menus.

To begin bid submission using an Excel uploader:

1. Go to the tender invitation page

#. From the Tender menu select Excel Bid Importer .. image:: ../img/ExcelBidImporter.png

alt

some image

1. From the Tender menu select Excel Bid Importer JetFuelTenders will generate a customised template with tender information
2. Open the downloaded Excel file This file contains multiple sheets. Bids are entered in the following three sheets:
 - Locations
 - Volume Base Fees & Taxes
 - Per Usage Base Fees & Taxes
3. Go to the Locations sheet Complete all mandatory fields in this sheet. Use the below information to reference the input format.
4. Go to the Volume Base Fees & Taxes Input any related fees and taxes for each specific location. One fee or tax per row
5. Go to the Per Usage Base Fees & Taxes Input any related fees and taxes for each specific location. One fee or tax per row
6. When ready, save the Excel document and upload it to JetFuelTenders.com by clicking on the Import button on the tender page or send this document to the airline via emails.

The goal of JetFuelTenders.com is to allow airlines and fuel suppliers to run digital tenders without the need for exchanging data via email by sending over spreadsheets. We understand, however, that many suppliers have their own internal database which automatically generates fuel price offers.

If your company's database can transmit your bid data via a spreadsheet, an XML file, or via an API data-feed, then it is possible to integrate with JetFuelTenders.com and automate the transmission of your offers into the JetFuelTenders.com platform.

The process requires a one-time configuration and basic understanding of Excel.

The goal of JetFuelTenders.com is to allow airlines and fuel suppliers to run digital tenders without the need for exchanging data via email using spreadsheets. We understand, however, that many suppliers have their own internal database which automatically generates fuel price offers.

If your company's database can transmit your bid data via a spreadsheet, an XML file, or via an API data-feed, then it is possible to integrate with JetFuelTenders.com and automate the transmission of your offers into the JetFuelTenders.com platform.

The process requires a one-time configuration and a strong knowledge of excel. I would be happy to set up a one-on-one session with you or your technical team to walk you through this process.

In this video, I will show you how to upload your offers via an excel file.

This document is based on IATA XML Tender / Bid Fuel Data Standard.

This tutorial explains how to prepare the Excel file for Import.

Before you begin:

1. Go to the tender invitation page
2. Click on Export and select Export Tender Information JetFuelTenders will generate a customized template with tender information
3. Open the downloaded Excel file This file contains multiple sheets. Bids are entered in the following three sheets:
 - Locations
 - Volume Base Fees & Taxes
 - Per Usage Base Fees & Taxes
4. Go to the Locations sheet Complete all mandatory fields in this sheet. Use the below information to reference the input format.
5. Go to the Volume Base Fees & Taxes Input any related fees and taxes for each specific location. One fee or tax per row
6. Go to the Per Usage Base Fees & Taxes Input any related fees and taxes for each specific location. One fee or tax per row
7. When ready, save the Excel document and upload it to JetFuelTenders.com by clicking on the Import button on the tender page or send this document to the airline via emails.

Warning: Please use the exported Excel file named "Tender Information" for importing bids.

The "Tender Bids" file should not be used for importing bids, as this file is used to export bids which have already been input, this document serves as a report after the tender has been completed.

The first 10 columns display the tender requirements for specified locations (do not edit columns A - J)

This document is based on IATA XML Tender / Bid Fuel Data Standard.

Here is a [sample Excel document](#) which you can use as reference.

Note: The bid importer is not case sensitive, so values can be input in lowercase or uppercase.

You can delete row with the locations which you will not be submitting and only leave the row with the bids. Do not remove any row headers.

3.1 Location Sheet - Field Details

3.1.1 Bid Round*

Example value: 1

Description: Numerical identifier of the bid round

3.1.2 Open Invoice - Payment Terms

Conditional field: Only applicable and mandatory for “Open Invoice” payments, leave empty if prepayment is required.

Example value: 3

Description: Number of days between payment reference date and payment

3.1.3 Open Invoice - Payment Reference Date

Conditional field: Only applicable and mandatory for “Open Invoice” payments, leave empty if prepayment is required.

Example value: LD

Description: this field should be populated with one of the following codes

Code	Description
FD	First Delivery Date
ID	Invoice Date
LD	Last Delivery Date
MD	Midpoint Delivery Date
IR	Invoice receiving date

3.1.4 Open Invoice - Invoice Frequency

Conditional field: Only applicable and mandatory for “Open Invoice” payments, leave empty if prepayment is required.

Example value: D/1

Description: this field should be populated with one of the following codes

Code	Description
B/0	Per delivery (B/L)
D/1	Daily
D/3	Every 3 days
M30	Monthly
S/15	Semimonthly
T/10	Every 10 days
W/7	Weekly
Q/4	Quarterly
Q/2	Semiannually
A/1	Annually

3.1.5 Invoice Type

Example value: PDF

Description: What format is used for sending invoices?

This field should be populated with one of the following codes.

Code	Description
XML_3_2_1	XML_3_2_1
XML_3_2_0	XML_3_2_0
XML_3_1_0	XML_3_1_0
XML_3_0_1	XML_3_0_1
XML_3_0_0	XML_3_0_0
XML_2_0_2	XML_2_0_2
EDI	EDI
PPR	Paper
PDF	PDF Format
EXC	Excel

3.1.6 Prepayment - Number Of Days Prepaid

Conditional field: Only applicable and mandatory for “Prepayment”, leave empty if “Open Invoice” is used.

Example value: 3

Description: How many days of deliveries must prepayment cover?

3.1.7 Prepayment - Payment First Delivery Date

Conditional field: Only applicable and mandatory for “Prepayment”, leave empty if “Open Invoice” is used.

Example value: 3

Description: Number of days prior to first delivery that payment is due

3.1.8 Prepayment - Payment Frequency

Conditional field: Only applicable and mandatory for “Prepayment”, leave empty if “Open Invoice” is used.

Example value: D/1

Description: How often is the prepayment required. This field should be populated with one of the following codes.

Code	Description
B/0	Per delivery (B/L)
D/1	Daily
D/3	Every 3 days
M30	Monthly
S/15	Semimonthly
T/10	Every 10 days
W/7	Weekly
Q/4	Quarterly
Q/2	Semiannually
A/1	Annually

3.1.9 Prepayment - Amount

Conditional field: Only applicable and mandatory for “Prepayment”, leave empty if “Open Invoice” is used.

Example value: 500

Description: Specify the prepayment amount due in payment currency

3.1.10 Payment Currency*

Example value: USD

Description: This field should be populated with one of the following codes.

Code	Description
USD	United States of America, Dollars
AED	United Arab Emirates, Dirhams
AFN	Afghanistan, Afghani
ALL	Albania, Leke

3.1.11 Payment Unit*

Example value: USG

Description: This field should be populated with one of the following codes.

Code	Description
USG	US Gallons
KG	Kilograms
LBS	Pounds
LTR	Liters
MT	Metric Ton
BBL	Barrels
CBM	Cubic Metre

3.1.12 Method Of Payment

Example value: CO

Description: This field should be populated with one of the following codes.

Code	Description
CA	Cash
CC	Credit Card
CN	Carnet
CO	Contract

3.1.13 Guarantees Deposits Required

Example value: Y

Description: Indicate if any bank guarantees or money deposits are required. This field should be populated with one of the following codes.

Code	Description
Y	Yes
N	No

3.1.14 Payment - Exchange Financial Source

Example: ARGUS

Description: This field should be populated with one of the following codes.

Code	Description
ARGUS	ARGUS
BOCD	Royal Bank of Canada
BOCN	Bank of China
BOJPN	Bank of Japan
BOKO	Bank of Korea
BONG	Central Bank of Nigeria
BORUS	Central Bank of the Russian Federation
BOSA	Bank of South Africa
BOSAR	South African Reserve Bank
BOTOK	Bank of Tokyo
BOTRK	Central Bank of the Republic of Turkey
CSH	CS Holding
BODN	Danish National Bank
DLH	Deutsch Lufthansa
ECB	European Central Bank
EGPC	EGPC

3.1.15 Payment - Exchange Averaging Method

Example value: WT

Description: This field should be populated with one of the following codes.

Code	Description
WC	Weekly calendar days
WT	Weekly trading days
SC	Semimonthly calendar days
ST	Semimonthly trading days
MC	Monthly calendar days
MT	Monthly trading days
DC	Daily calendar days
IR	Irregular
NC	1st-25th calendar days
NT	1st-25th traded days
FC	Fortnight (11th-25th)/(26th-10th) calendar days
FT	Fortnight (11th-25th)/(26th-10th) traded days
FCB	Fortnight (1st-15th)/(16th-31st) calendar days
FTB	Fortnight (1st-15th)/(16th-31st) traded days
XC	Semimonthly calendar days with deviating average
XT	Semimonthly trading days with deviating average
QC	Quarterly calendar days
QT	Quarterly traded days
M20C	Monthly [20] calendar
M20T	Monthly [20] traded

3.1.16 Payment - Exchange Averaging Offset

Example value: N-1

Description: This field should be populated with one of the following codes.

Code	Description
N+0	Current period
N-1	Previous period
N-2	Period before previous period
N+1	Next period

3.1.17 Supply Conditions Comments

Description: Provide any comments related to the supply conditions

3.1.18 Delivery Point*

Example value: Ex-hydrant

Description: This field should be populated with one of the following codes.

Code	Description
INP	Into plane
INS	Into storage
INW	Into wing
EXR	Ex-Rack
IPI	Into pipeline

3.1.19 Index - Provider

Conditional field: Only applicable and mandatory for Index based prices, leave empty if this location uses market price base.

Example value: Platts

Description: This field should be populated with one of the following codes.

Code	Description
Platts	Platts
Argus	Argus
Opis	Opis

3.1.20 Index - Code

Example value: AAFIY00

Description: Note that the index base is specified as a separate field. This field should be populated with one of the following codes.

Provider	Provider code	Description
Platts	AAFIY00	Jet Kero C+F Australia Cargo

3.1.21 Index - Bate

Conditional field: Only applicable and mandatory for Index based prices, leave empty if this location uses market price base.

Example value: h

Description: This field should be populated with one of the following codes.

Code	Description
l	Low
c	Close / Mean
h	High

3.1.22 Index - Averaging Method

Conditional field: Only applicable and mandatory for Index based prices, leave empty if this location uses market price base.

Example value: WT

Description: This field should be populated with one of the following codes.

Code	Description
WT	Weekly trading days
MT	Monthly trading days
DC	Daily calendar days
FT	Fortnight (11th-25th)/(26th-10th) traded days
FCB	Fortnight (1st-15th)/(16th-31st) calendar days
FTB	Fortnight (1st-15th)/(16th-31st) traded days
ST	Semimonthly trading days
XT	Semimonthly trading days with deviating average

3.1.23 Index - Averaging Offset

Conditional field: Only applicable and mandatory for Index based prices, leave empty if this location uses market price base.

Example value: N-1

Description: This field should be populated with one of the following codes.

Code	Description
N+0	Current period
N-1	Previous period
N-2	Period before previous period
N+1	Next period

3.1.24 Price Effective Date

Conditional field: Only applicable and mandatory for Index based prices, leave empty if this location uses market price base.

Example value: 1

Description: This field should be populated with one of the following codes.

Code	Description
1	Monday
2	Tuesday
3	Wednesday
4	Thursday
5	Friday
6	Saturday
7	Sunday

3.1.25 Market Price - Amount

Conditional field: Only applicable and mandatory for market based prices, leave empty if this location uses index price base.

Example value: 3.1234

Description: Value of the market price.

3.1.26 Market Price - Currency

Example value: USD

Description: This field should be populated with one of the following codes.

Code	Description
USD	United States of America, Dollars
AED	United Arab Emirates, Dirhams

3.1.32 Differential Unit*

Example value: USG

Description: This field should be populated with one of the following codes.

Code	Description
USG	US Gallons
KG	Kilograms
LBS	Pounds
LTR	Liters
MT	Metric Ton
BBL	Barrels
CBM	Cubic Metre

3.1.33 Non-mandatory Fees

Example value: Low volume fee 120 EUR for uplifts under 1500 USG

Description: List any non-mandatory fees.

3.1.34 Into-plane Service Provider

Example value: Skytanking LLC

3.1.35 Available Volume Percentage

Example value: 100

Description: Speify how many percent of the total requested volume are you bidding for.

3.1.36 Gross or Net Billing

Example value: gross

Description: This field should be populated with one of the following codes.

Code	Description
gross	Gross Billing
net	Net Billing

3.1.37 Open Fuel Release

Example value: Y

Description: This field should be populated with one of the following codes.

Code	Description
Y	Yes
N	No

3.1.38 Pre-flight Notification Hours

Example value: 16

Description: If pre-flight notification is required, specify how many hours advance notice should be given

3.1.39 Pre-flight Notification Notes

Description: Provide pre-flight notification notes if available

3.1.40 Ramp Limitations Notes

Description: Provide ramp limitation notes if available

3.1.41 Fuel Availability

Description: Provide fuel availability notes if restrictions apply

3.1.42 Delivery Method to Airport 1

Example value: pipeline

Description: If the airline requests information on delivery methods to the airport list them in the order of priority, where the primary method is listed in the “Delivery Method to Airport 1” field.

This field should be populated with one of the following codes.

Code	Description
pipeline	Pipeline
truck	Truck
rail	Rail
barge	Barge

3.1.43 Delivery Method to Airport 1 Percentage

Example value: 80

Description: What percentage of the total fuel delivery methods is Delivery Method to Airport 1 covering?

Additional delivery methods can be specified in the following columns, using the same logic as above

- Delivery Method to Airport 2
 - Delivery Method to Airport 2 Percentage
 - Delivery Method to Airport 3
 - Delivery Method to Airport 3 Percentage
 - Delivery Method to Airport 4
 - Delivery Method to Airport 4 Percentage
-

3.1.44 Delivery Method to Aircraft

Example value: both

Description: This field should be populated with one of the following codes.

Code	Description
hydrant	Hydrant
truck	Truck
both	Both hydrant & truck

3.1.45 Notes

Description: Provide any notes related to this bid

3.2 Volume Base Fees & Taxes Sheet - Field Details

3.2.1 IATA Location

Example value: LKPR

Description: This location needs to correspond to atleast one location listed in the Locaitons sheet. The entered fees or taxes will be added to the corresponding bid.

3.2.2 Fee or Tax Name

Example value: Throughput fee

3.2.3 Amount or Percentage

Example value: 0.05

3.2.4 Amount Currency

Conditional field: Only applicable and mandatory this fee or tax tax is amount based. Leave this field empty if the fee or tax tax is percentage based.

Example value: USD

Description: This field should be populated with one of the following codes.

Code	Description
USD	United States of America, Dollars
AED	United Arab Emirates, Dirhams
AFN	Afghanistan, Afghani

USER MANAGEMENT

A step by step guide on how to invite colleagues to access tender information.

The user management tool allows you to share tender information with members of your team.

1. Sign in to jetfueltenders.com
2. Go to Settings > Manage Users
3. Click on Add User
4. Enter user information (Email, position, first and last name, phone
5. Select the user role
6. Click Save

4.1 User Roles

Role	Permissions
Viewer	Users will be able to view and export tender information.
User	Users will be able to view, export and manage tenders.
Manager	Users can do all the above as well as manage users.

Once a new user is saved, an email is sent to the user's email address. This email will contain a link to the "Set Password" page where the user will finalised the setup process.

The account will be instantly activated as soon as the password is set.

Our Support Team is happy to answer any questions or provide free one-on-one training.

Contact us at info@jetfueltenders.com

TERM SPECIFICATIONS

5.1 IATA Service Levels

LEVELS OF SERVICE There are FOUR (4) Levels of Into-Plane Fuelling Service ranging from the least complex, as outlined in Level 1 requirements, to the most complex, as outlined in Level 4. The Fuelling Personnel will be considered to be an Authorised Refueller, qualified to operate aircraft switches to refuel aircraft, if they have successfully completed the training provided by an Approved Fuelling Instructor. Training will include each aircraft fleet type assigned to the station, including diversion fleet types. Details of the requirements are identified in the Fuelling operative Levels 1 through 4.

5.1.1 LEVEL 1: MINIMUM LEVEL OF SERVICE

- A. The Fuelling Personnel of the contracted company is essentially to provide up-to plane service that includes:
 - (1) operating a fuel vehicle, making necessary nozzle connections to fuel hydrant pit and aircraft;
 - (2) operating the deadman control.
- B. An airline-authorised refueller will perform all other into-plane fuelling procedures and is responsible for all fuel servicing requirements.
- C. Level 1 service includes all the following base level procedures only:
 - (1) Have adequate knowledge of fuelling vehicle systems and operations.
 - (2) Approach and position the fuelling vehicle at the aircraft in accordance with local and driving regulations.
 - (3) Set fuelling vehicle brake and install wheel chocks if brake interlocks are not installed.
 - (4) Bond fuelling vehicle to aircraft and ground if required.
 - (5) Open aircraft wing fuelling panel and remove fuelling adapter caps (if installed).
 - (6) Connect fuelling hoses to aircraft.
 - (7) Hydrant system – connect hydrant coupler to hydrant pit valve.
 - (8) Provide fuel volume and density of fuel loaded, when requested.
 - (9) Perform clear and bright fuel appearance checks at the aircraft in accordance with operating procedures, and perform chemical water detection test when required.
 - (10) Engage and operate the deadman control under the direction and supervision of the Airline Authorised Refueller.
 - (11) Monitor vehicle fuelling pressures to ensure maximum limits are not exceeded.
 - (12) At completion of fuelling, disconnect fuelling nozzle from aircraft, replace fuelling adapter caps (if installed) and close fuel panel access door.

- (13) Hydrant system – close hydrant pit valve and disconnect hydrant coupler.
- (14) Disconnect bonding cable and ground if applicable.
- (15) Provide fuel delivery receipt to representative for signature prior to aircraft departure.
- (16) Provide assistance when defuelling of aircraft is required.
- (17) The Fuelling Personnel has final responsibility to verify that all hoses and static grounding/bonding attachments have been disconnected from aircraft (including hydrant pit, where applicable) and are properly stowed prior to moving fuelling vehicle.
- (18) Perform walk around inspection.

5.1.2 LEVEL 2: ROUTINE FUELLING – TOTAL FUEL REQUIRED

A. Level 2 service includes all the items listed in level 1 plus all the items listed in the following procedures below:

- (1) Obtain documented Total fuel figure from airline representative prior to fuelling.
- (2) Perform gauge and system tests as appropriate for aircraft type.
- (3) Fuel aircraft to the Total fuel requirement using the aircraft Automatic fuelling mode as determined by an airline representative.
- (4) Complete kilo/pounds or litre/gallons conversion, when required.
- (5) Set wing panel switches and gauges and control the amount of fuel being added to the aircraft using aircraft Automatic loading settings.
- (6) Communicate with opposite wing Fuelling Operative when two fuelling vehicles are used to fuel the aircraft.
- (7) Communicate with cockpit via headphone, if required.
- (8) Monitor wing panel gauges, vehicle pressure gauges and fuel tank vents for spills during fuelling.
- (9) Deliver completed fuel service form (where supplied) to operations or cockpit crew.

5.1.3 LEVEL 3: ROUTINE FUELLING – DISTRIBUTION REQUIRED & DISCREPANCY CHECKING

A. Level 3 service includes all the items listed in levels 1 & 2 plus all the items listed in the following procedures below:

- (1) Obtain Aircraft Refuel Sheet from airline or fuelling company representative prior to fuelling.
- (2) Read refuel panel gauges before and after fuelling and enter readings on to Aircraft Refuel Sheet.
- (3) Fuel aircraft per fuel uplift calculations as determined and entered on the Aircraft Refuel Sheet.
- (4) Set refuel panel switches and gauges and control the amount of fuel being added to the aircraft using aircraft manual or automatic loading settings.
- (5) When fuelling various fleet types, be qualified to interpret Fuel Manual distribution charts and follow fuel distribution procedure in accordance with the specific fleet type.
- (6) Calculate Fuel weight in kilos/ pounds (from density) at aircraft on designated flights using hydrometer.
- (7) Calculate fuelling discrepancy and compare with maximum allowable. If it is outside limits, contact a Level 4 / Airline Authorised Refueller to check fuel levels as required.

5.1.4 LEVEL 4: NON-ROUTINE FUELLING

- A. At this level of service, the Fuelling Personnel of the Contracted Fuel Supplier provides full into-plane fuelling capability that includes all routine and alternate fuelling requirements for aircraft scheduled for that station.
- B. Level 4 service includes all the items listed in levels 1, 2 & 3 plus all the items listed in the following procedures below:
 - (1) Be qualified to interpret Fuel Manual drip stick tables and drip stick conversion charts.
 - (2) Operate and read measuring stick measurements to determine tank quantity:
 - a) When requested by the Flight Crews.
 - b) When quantity added exceeds tolerance (discrepancy).
 - c) For tank with an inoperative gauge.
 - d) To verify pre-service differences.
 - (3) Perform non-routine fuelling procedure when any one cockpit gauge is inoperative, using measuring sticks and fuel vehicle meter or measuring sticks and operative aircraft gauges, to provide a known quantity in the tank with the inoperative gauge.
 - (4) Enter cockpit when a refuel panel gauge is inoperative and direct fuelling, via headphone, using operative cockpit gauge to determine tank quantity.
 - (5) Perform tank to tank transfer or defuel aircraft using boost pumps, override pumps, and cross feeds when required.
 - (6) Carry out overwing fuelling of pressure fuelled aircraft when required.

Our Support Team is happy to answer any questions or provide free one-on-one training.
